I didn't forward the other Alura emails that I know you already have.

Trish Taylor, Community Involvement Coordinator
Hazardous Site Cleanup Division (Mailcode 3HS52)

Ron- Seeing the actual message, this clears up some of the confusion. It doesn't indicate what has just happened since the emails are over a year old and pre-date the DEP Order with Cabot.

Linda: this is what I was calling you about. Karen has been very helpful in trying to figure out what's going on by reaching out to State and we're waiting to hear what the results are. Trish Taylor is the CIC that is helping Mike D work with the citizens.

Hi Ron,

This is one of about six or seven emails I've received in the last 10 minutes demanding an "emergency community outreach meeting" re: drinking water issues related to drilling. This one has a more extensive email list than the others, -- so you can see who's been copied on the message(s). They are also requesting that EPA test drinking water specifically for residents who live on Carter Road, in Dimock

Ex. 5 - Deliberative

Thanks,

Trish Taylor, Community Involvement Coordinator

What is left to be said or happen to get EPA to have an emergency community outreach meeting with Carter Rd residents whose drinking water has been determined by DEP by Duke by Independent Labs to have been affected by shale gas activities through isotopic analyses. Please see the attached DEP INTERNAL DISCUSSIONS about the stray methane in Dimock. When can EPA meet with affected residents whose state (PA) is letting the industry walk away from accountability.

What date works for an EPA Emergency Meeting?

Sincerely, Rebecca Roter 267-733-5211
